

Access keys

If you have difficulty in using a mouse or similar devices, you can use keyboard shortcuts. We follow the government's access key system. The keyboard shortcuts are:

0 - Access key details

1 - Home page

3 - Site Map

4 - Search

6 - Privacy

7 - Website Disclaimer

8 - Terms & Conditions

9 - Contact us

S - Skip navigation

How do I use the access keys for my browser?

- **Internet Explorer 5+:** Hold down the ALT key and select the number/letter of the access key, then press ENTER.
- **Internet Explorer 4:** Hold down the ALT key and select the number/letter of the access key.
- **Internet Explorer 5+ for Mac:** Hold down the CTRL key and select the number/letter of the access key
- **Internet Explorer 4.5 for Mac:** Access keys are not supported.
- **Netscape 6+:** Hold down the ALT key and select the number/letter of the access key.
- **Netscape earlier versions:** Access keys are not supported.
- **Mozilla:** Hold down the ALT key and select the number/letter of the access key.

Resizing text

If the text is too small for you to read comfortably then you can resize it. Instructions are given for major browsers below:

- **Internet Explorer 4:**
Choose View > Internet Options > Accessibility, and check the *Ignore font sizes* option specified on Webpages Options. Click OK twice, and then you can alter the text size using the View >Text Size option.
- **Internet Explorer (version 5 and later):**
Choose Tools > Internet Options > Accessibility, and check the *Ignore font sizes* option specified on Webpages Options. Click OK twice, and then you can alter the text size using the View >Text Size option.
- **Mozilla Firefox:**
Select the keys CTRL and + (From menu: View, Text Size, Increase) together to increase text size and CTRL and - to reduce it (From menu: View, Text Size, Decrease).
- **All other browsers:**
You should be able to resize the text directly from the menu bar. Please see your specific browser help pages if you are having difficulty.
