Leigh House Hospital

MEDICAL STAFF

At Leigh House we have two Consultant Psychiatrists, as well as an Associate Specialist. We also have an experienced Specialty Doctor. We may have psychiatry trainees and medical students.

There is a regular clinical meeting of all team members at Leigh House which is chaired by the lead clinician. This will be Psychiatrist or Associate Specialist. You should attend to ensure collaborative decision making about your care. If you can't attend you should complete the feedback forms so that your views are heard and actioned. Your progress will be discussed at this meeting and plans made for your further treatment. The case holder is available to all members of the team to co-ordinate and advise on your treatment.

In addition to your case-holder there will be another doctor allocated to you. This will be the speciality doctor or psychiatry trainee. They will meet with you regularly to hear how you are progressing, review your medication, manage any physical health problems and make recommendations about your treatment.
